```
1 import streamlit as st
2
3 def show_home():
4     st.markdown('<h1 style = "text-align: center;">
  Phoenix Home Price Predictor Model</div>',
5                 unsafe_allow_html=True)
6
7     st.image('house.jpg')
8
9     st.caption('This model was created to calculated
  a predicted house price based on a set of input
  criteria. The app contains a map of the model data, a
   zipcode scatterplot of sales over the last year, a
  statistics page by zipcode, pool and HOA, a
  correlation of features visual and lastly the
  calculator. The model data is limited to a maximum
  selling price of 500,000.')
